Total	0	4,660.0	4,660.0	0	4,773.0	4,773.0	0	4,874.0	4,874.0
Narrative Justification:									
Description									
IBS is the lead execution system of the Defense Transportation System (DTS) for the global movement of deploying forces and sustainment ocean cargo. The IBS consists of the following applications: Carrier Analysis and Rate Evaluation Headquarters (CARE HQ), Carrier Analysis and Rate Evaluation Service Application (CARE SA), Requirements Forecasting and Rate Evaluation (RF-RAM), UNIT, Sustainment (SUS), Commercial Sealift Solutions (CSS), Ocean Carrier Interface (OCI), One-Time-Only (OTO), Advance Transportation Control and Movement Document (ATCMD) and Electronic Shipper System (ESS) IBS-T: Vessel Schedule (VS), Fleet Management (FM), Port Point Of Contact (PPOC), Reference Data (RD). These applications provide automated tool support for the following: carrier contract requirement definition, rate and service solicitations, and evaluation; input vessel schedules; booking unit and sustainment cargo; produce shipment documentation; provide cargo offering and status information; provide payment information and provide In Transit Visibility (ITV) information.									
Mission Benefits									
IBS supports Military Surface Deployment and Distribution Command's (SDDC) global surface deployment command & control and distribution mission by providing automated tools to support rapid, effective and efficient projections of power CONUS and OCONUS. IBS provides end-to-end distribution and visibility of DOD cargo from time of request until payment to the ocean carrier for services provided. IBS ensures the most cost effective routing of cargo is utilized while ensuring the war fighter receives his cargo on time and cargo preference laws are met. IBS provides tools for carrier contract requirement definition; rate and service solicitations and evaluation; capture vessel schedules; book unit and sustainment cargo; produce shipment documentation; provide cargo offering and event status information; and produce payment information. IBS provides high-level data quality edits with instantaneous in-the-clear error messages and utilizes Electronic Commerce and Electronic Data Interchange standards.SDDC's Transportation Enhanced Access Management Service web portal provides DOD transportation officials with a single sign-on capability to access IBS for their transportation needs.									
Deliverables									
Support cargo booking in the payment process and meet the Financial Improvement and Audit Readiness; Decompose booking capabilities into decoupled information and application services to support Enterprise re-use; Implementation of Ocean transportation contracts and contractual obligations to support the Universal Service Contract 9 and Guantanamo Bay Cuba contracts.									
Economic Analysis									
Certified 15 Jun 10.									
Impact									
If not funded, IBS will be unable to support United States Transportation Command's and SDDC's mission to provide efficient and cost effective projection of forces; nor provide improved end-to-end joint deployment and distribution. Specifically, maintenance, new software development and sealift requirement processing will terminate. Without commercial contract support, IBS will not be able to function and DOD ocean cargo movement would not be supported by an automated system. In addition, pricing and processing of electronic carrier feeds will no longer maintain valid information requiring manual payment intervention by SDDC booking offices.

Department of the Air Force USTRANSCOM Command Staff			Line No. & Item Description Local Area Network (USTRANSCOM LAN)			Activity Identification Command Staff			
Element of Cost	FY2023			FY2024			FY2025		
	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost
B. ADPE/Telecomm	0	2,820.0	2,820.0	0	0.0	0.0	0	2,140.0	2,140.0
Total	0	2,820.0	2,820.0	0	0.0	0.0	0	2,140.0	2,140.0
Narrative Justification:									
Description									
USTRANSCOM Local Area Network (LAN) a critical system supporting the Command and Control (C2) communications of the USTRANSCOM Commander and staff. It is comprised of ~ 6000 distinct personal computers, numerous servers and routers, a multitude of switches, and the hardware and software infrastructure comprising the classified and unclassified LANs at the USTRANSCOM command site on Scott AFB, IL. This program supports the following activities: Upgrade of network infrastructure to support increasing bandwidth, service, systems and reliability requirements. Server upgrades, network router and switch upgrades, cable installation, network component upgrades, and wide area network connectivity with component commands. Upgrade of standard server Commercial-off-the-Shelf (COTS) products. Provides worldwide Joint Deployment and Distribution Environment (JDDE) theater-centric Command, Control, Communications and Computers (C4) infrastructure baseline assessments, engineering and documentation. Provides hardware and system installation support. Provides studio and portable Video Teleconferencing (VTC) technical upgrade support. Provides Audio Visual (AV) presentation system technical upgrade support. Based on the outcome of the review, funding may require future adjustments.									
Mission Benefits									
The USTRANSCOM networks are comprised of classified and unclassified Local Area Network (LAN) segments and Wide Area Network (WAN) connectivity with transportation component commands (TCCs). USTRANSCOM LAN provides the critical backbone for the entire USTRANSCOM C2 capability. This critical infrastructure directly supports the 70+ C2 mission systems that are inherent with USTRANSCOM, providing a global picture for CCMDs on global logistical and patient movements.									
Deliverables									
End-of-Life technical refresh that includes Secret Internet Protocol Router Network switches, Adaptive Security Appliance Virtual Private Network (VPN) devices that combined firewall, antivirus, intrusion prevention, and VPN capabilities; Upgrade USTRANSCOM Wireless Fidelity (WiFi) infrastructure; Renewal of network infrastructure hardware maintenance that includes upgrading the Joint Enabling Capability Command infrastructure and Enterprise Voice over Internet Protocol (ECVOIP); Network support to 5500 workstations, 3 computing sites and 30 communications room; Backbone switching of the TC-CENET; Classified routing, VPN devices, OOB networks to securely transmit information.									
Economic Analysis									
N/A.									
Impact									
The interruption of capabilities would lead to rapid degradation of Command and Control for all aspects of the JDDE. Gaps in reporting data would immediately affect the Commanders decision cycle, crippling the ability of USTRANSCOM to accomplish its mission of managing Department of Defense transportation assets. We would also lose the redundancy that we have built into the USTRANSCOM LAN to diminish any mission impact.

	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost
C. Software Development	0	370.0	370.0	0	3,140.0	3,140.0	0	2,457.0	2,457.0
Total	0	370.0	370.0	0	3,140.0	3,140.0	0	2,457.0	2,457.0
Narrative Justification:									
Description									
TFMS must comply with the Office of the Under Secretary of Defense Comptroller (OUSD C) directive to become operational with the US Department of the Treasury, Bureau of the Fiscal Service G-Invoicing solution for Intragovernmental (IGT) General Terms and Conditions (GT&C) Buy/Sell transactions, Direct Treasury Disbursing, and Procure to Pay (P2P) handshake standardization.									
Mission Benefits									
The G-Invoicing platform provides a streamlined capability for processing and approving the GT&C, Order, Performance, and Funds Settlement tasks that occur as part of the IGT Buy/Sell lifecycle. The G-Invoicing solution supports standardized interagency agreement and transaction exchanges between the Requesting/Ordering (Buyer) and the Servicing/Performing (Seller) Agencies. Federal Intragovernmental Data Standards (FIDS) are utilized for conducting all IGT Buy/Sell actions. The Department of Defense's (DoD's) Business Enterprise Architecture (BEA) establishes a blueprint for the Department's business processes, data exchanges, and systems with the intent to maximize efficiency and interoperability throughout the processes. One of these processes, called Procure-to-Pay (P2P), details the steps to procure items, starting with a defined requirement, through contracting and vendor payment. Implementation of the P2P Handshakes will allow data traceability for procurement actions, to include tracking of funding and execution data; reduce or eliminate unmatched financial transactions within the DoD enterprise; ensure that committed funds are sufficient for, and traceable to, the specific line items within an award; support DoD Financial Improvement and Audit Readiness goals; and create efficiencies within the P2P environment. Transitioning to a single, Federal shared service solution under Treasury to perform all disbursement and collection will assist DoD in achieving auditability and sustainability for federal agencies Fund Balance With Treasury (FBWT).									
Deliverables									
Automation of G-Invoicing Servicing Agency capabilities and migration of existing orders into the G-Invoicing platform to meet mandated requirements; implementation of G-Invoicing Servicing Agency functionality for TFMS Ocean and Port Handling Lines of Business (TAC); integration of required data exchanges to meet OUSD directives; and utilization of the appropriate P2P PRDS and PDS standard handshakes to send and receive data exchanges with the Contract Order Writing System for Purchase Request and Commitment, Pre-Award Funds Validation, Procurement Award, Procurement Modification, and Procurement Close Out Notification data exchanges.									
Economic Analysis									
N/A									
Impact									
TFMS will fail to comply with OUSD mandates and DoD Financial Management (FM) Functional Strategy.

Narrative Justification:									
Description									
MC funds all construction work to rebuild new facilities or construct addition to the existing facilities for TWCF facilities.									
Mission Benefits									
The Headquarters Air Mobility Command (HQ AMC) TWCF investment strategy is in line with the Department of Defense (DoD) Transportation Vision for the Twenty-First Century. It's intent is to ensure sustainability and quality of life. One of the guiding principles requires us to invest in transportation programs, systems, and enhancements that support mobility requirements, assets visibility, and efficient transportation operations.									
Deliverables									
Deliverables will depend on the projects approved after EA/CA completed.									
Economic Analysis									
EA or CA is accomplished by projects approved.									
Impact									
Without funds, it will impact our ability to support requirements to enhance or improve mobility operations.									
Software

Narrative Justification:									
Description									
Surface Deployment and Distribution Command (SDDC) Minor Construction projects are scheduled for installations where SDDC has direct operations oversight. These installations are considered a vital part of the strategic Continental United States (CONUS) power projection platform supporting warfighting Commnanders around the world. The installations that SDDC has direct operations oversight are relied upon to maintain a high OPTEMPO consisiting of general cargo movements, ammunition resupply missions, pre-position operations and Foreign Military Sales operations.									
Mission Benefits									
Capital Projects are needed to ensure SDDC Brigades/Battalions achieve mission resilience and excellence by providing modern and efficient facilities for delivering general cargo, arms, ammunitions, and explosives to the warfighter. Projects will ensure the installation facilities and infrastructures are flexible, safe and sustainable. Ensure ready and resilient infrastrucetre capable of safely delivering current and future DoD cargo and ammunition transshipment requirements.									
Deliverables									
Projects ensure the safe, secure and sustainable network of interconnected operational support systems which enhance SDDC operations and cargo throughput capabilities regardless of contingency; now and into the future. To include adequate space and traffic flow for large material handling equipment to safely maneuver, mission support to enable rail cargo capabilities and security/monitoring to operational areas for operational oversight.									
Economic Analysis
